

DELTA OF TURIA

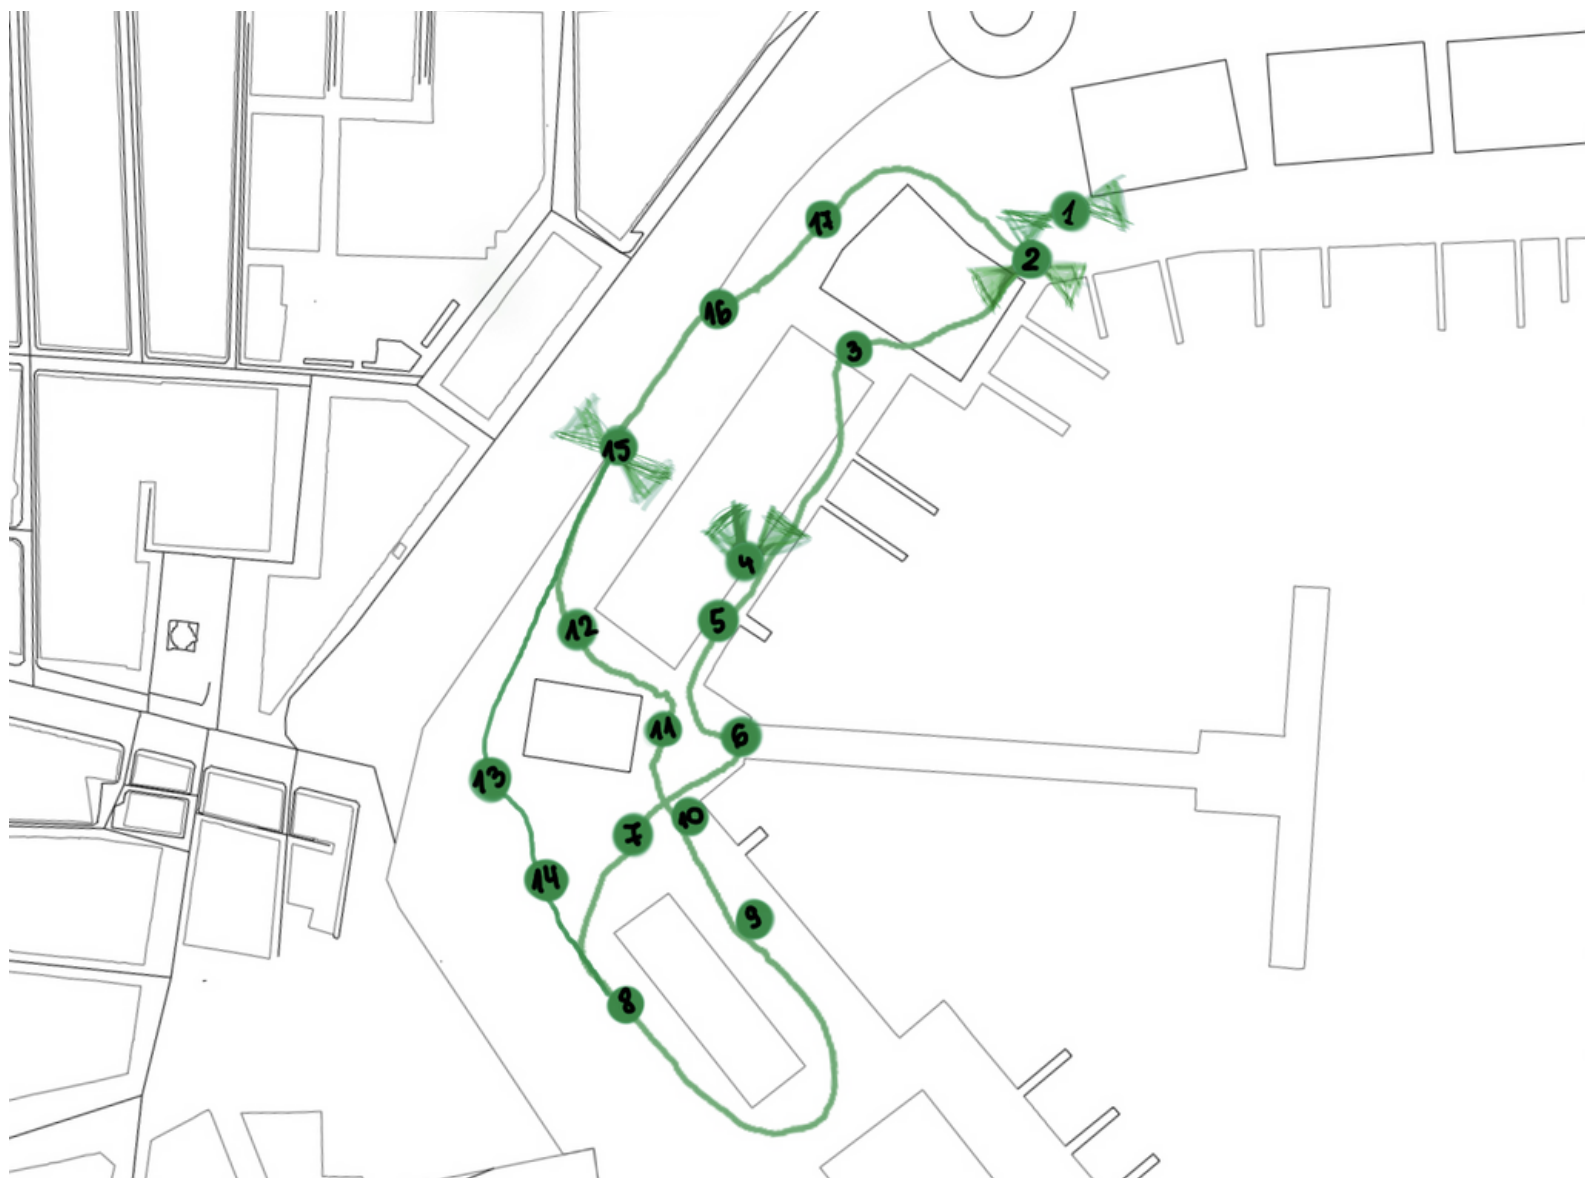

FIRST PEOPLE THEN MOBILITY

Katarzyna Kobik Łukasz Krężelok Alessandro Geroli

ACPS | Activation Of Contemporary Public Spaces

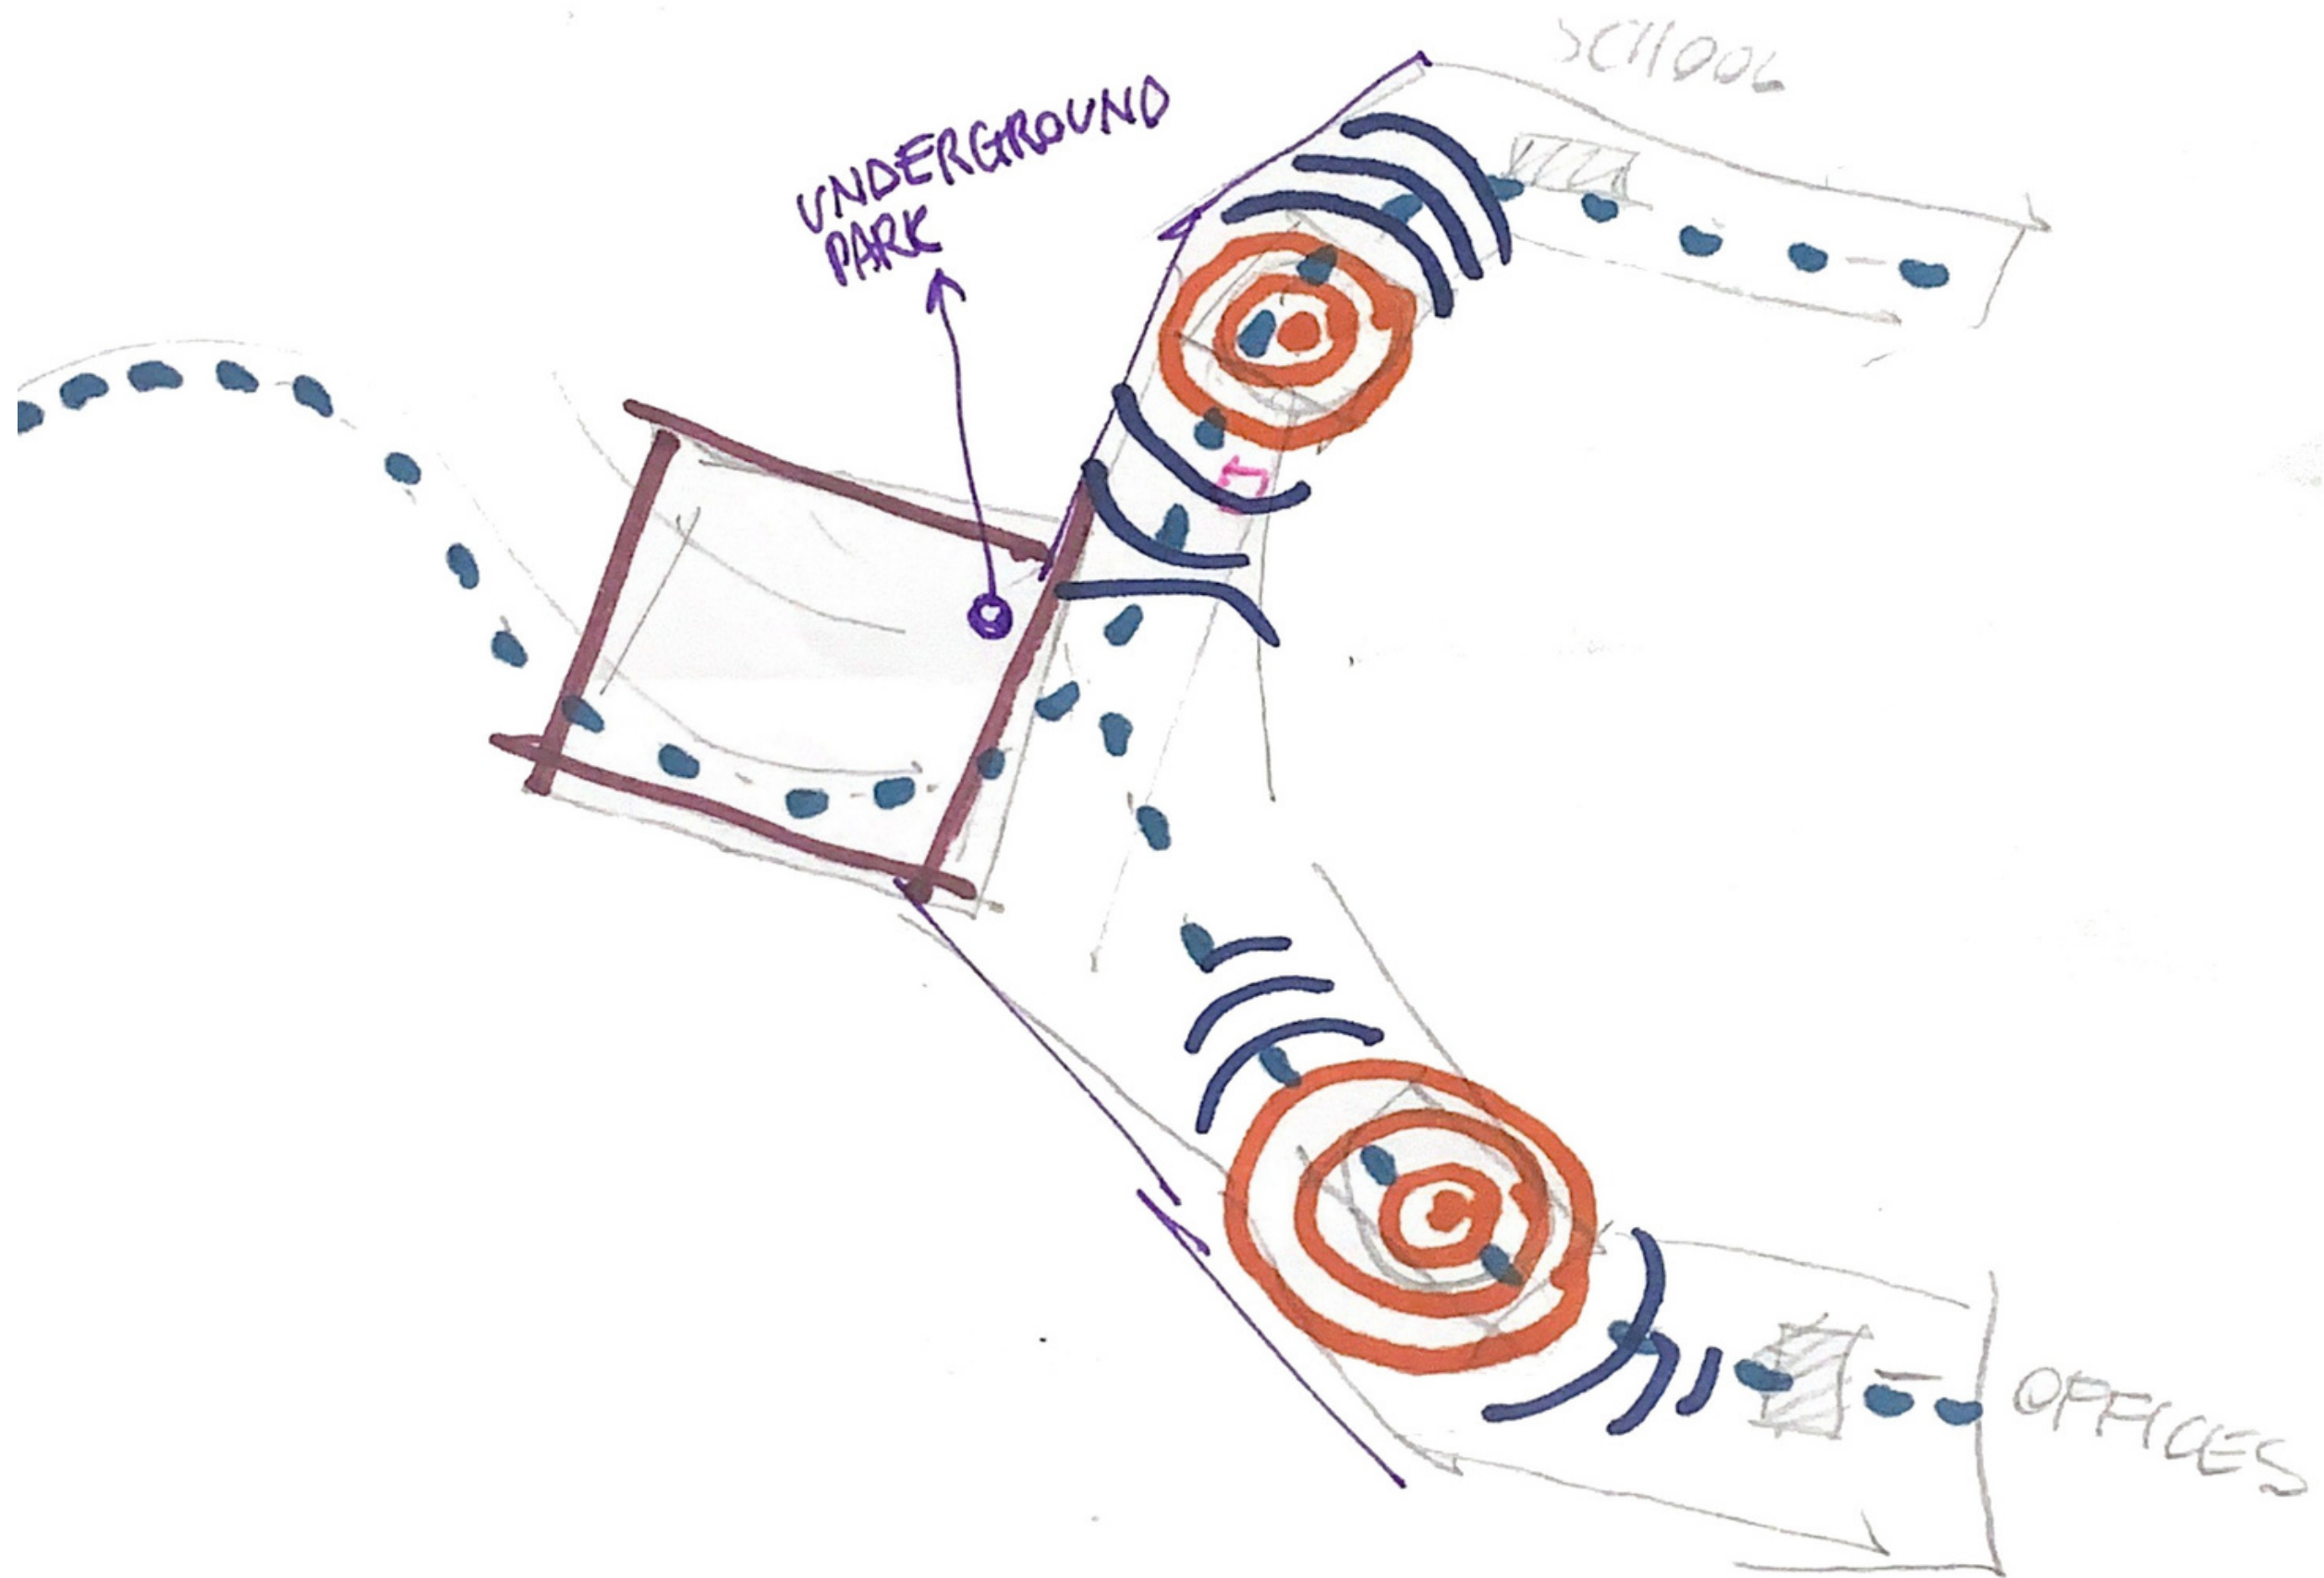

Current situation of the site

PROBLEMS

- lack of green areas
- focus on the cars
- lack of identity
- no social activity
- no human scale
- abandoned buildings without the meaning
- no connection to the city center
- limited public transport
- problem with homeless people

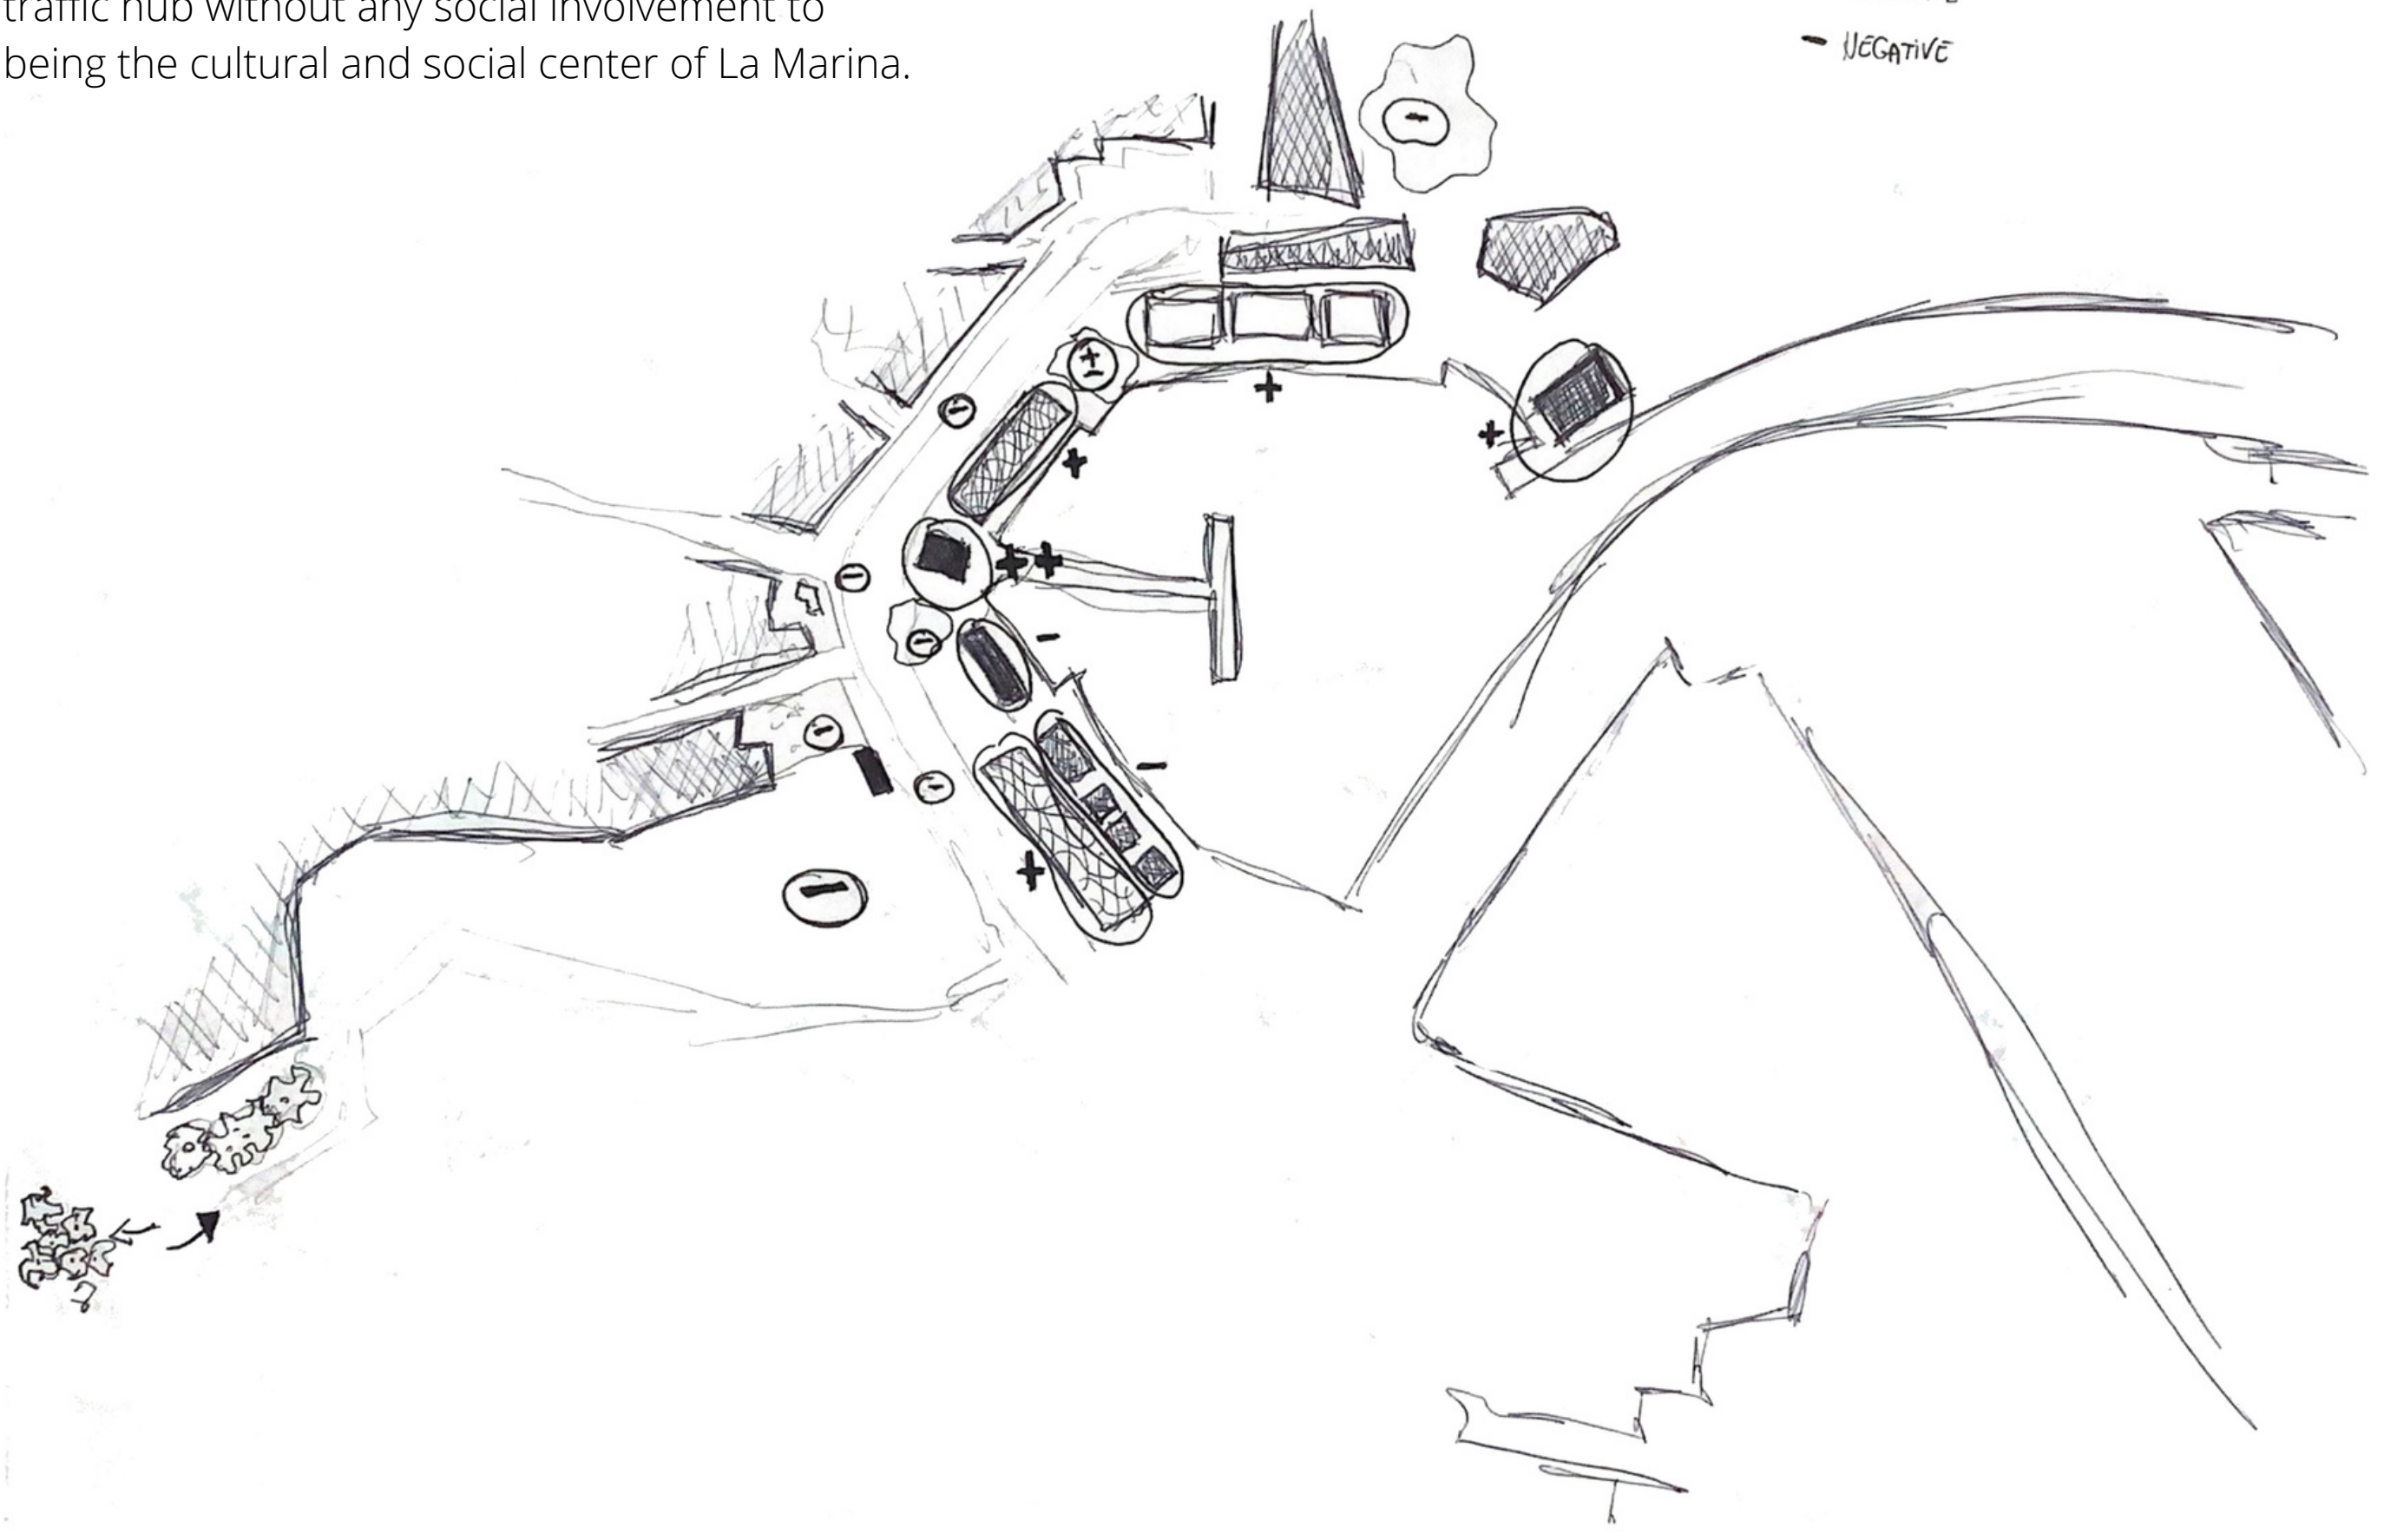

First ideas for the proposal

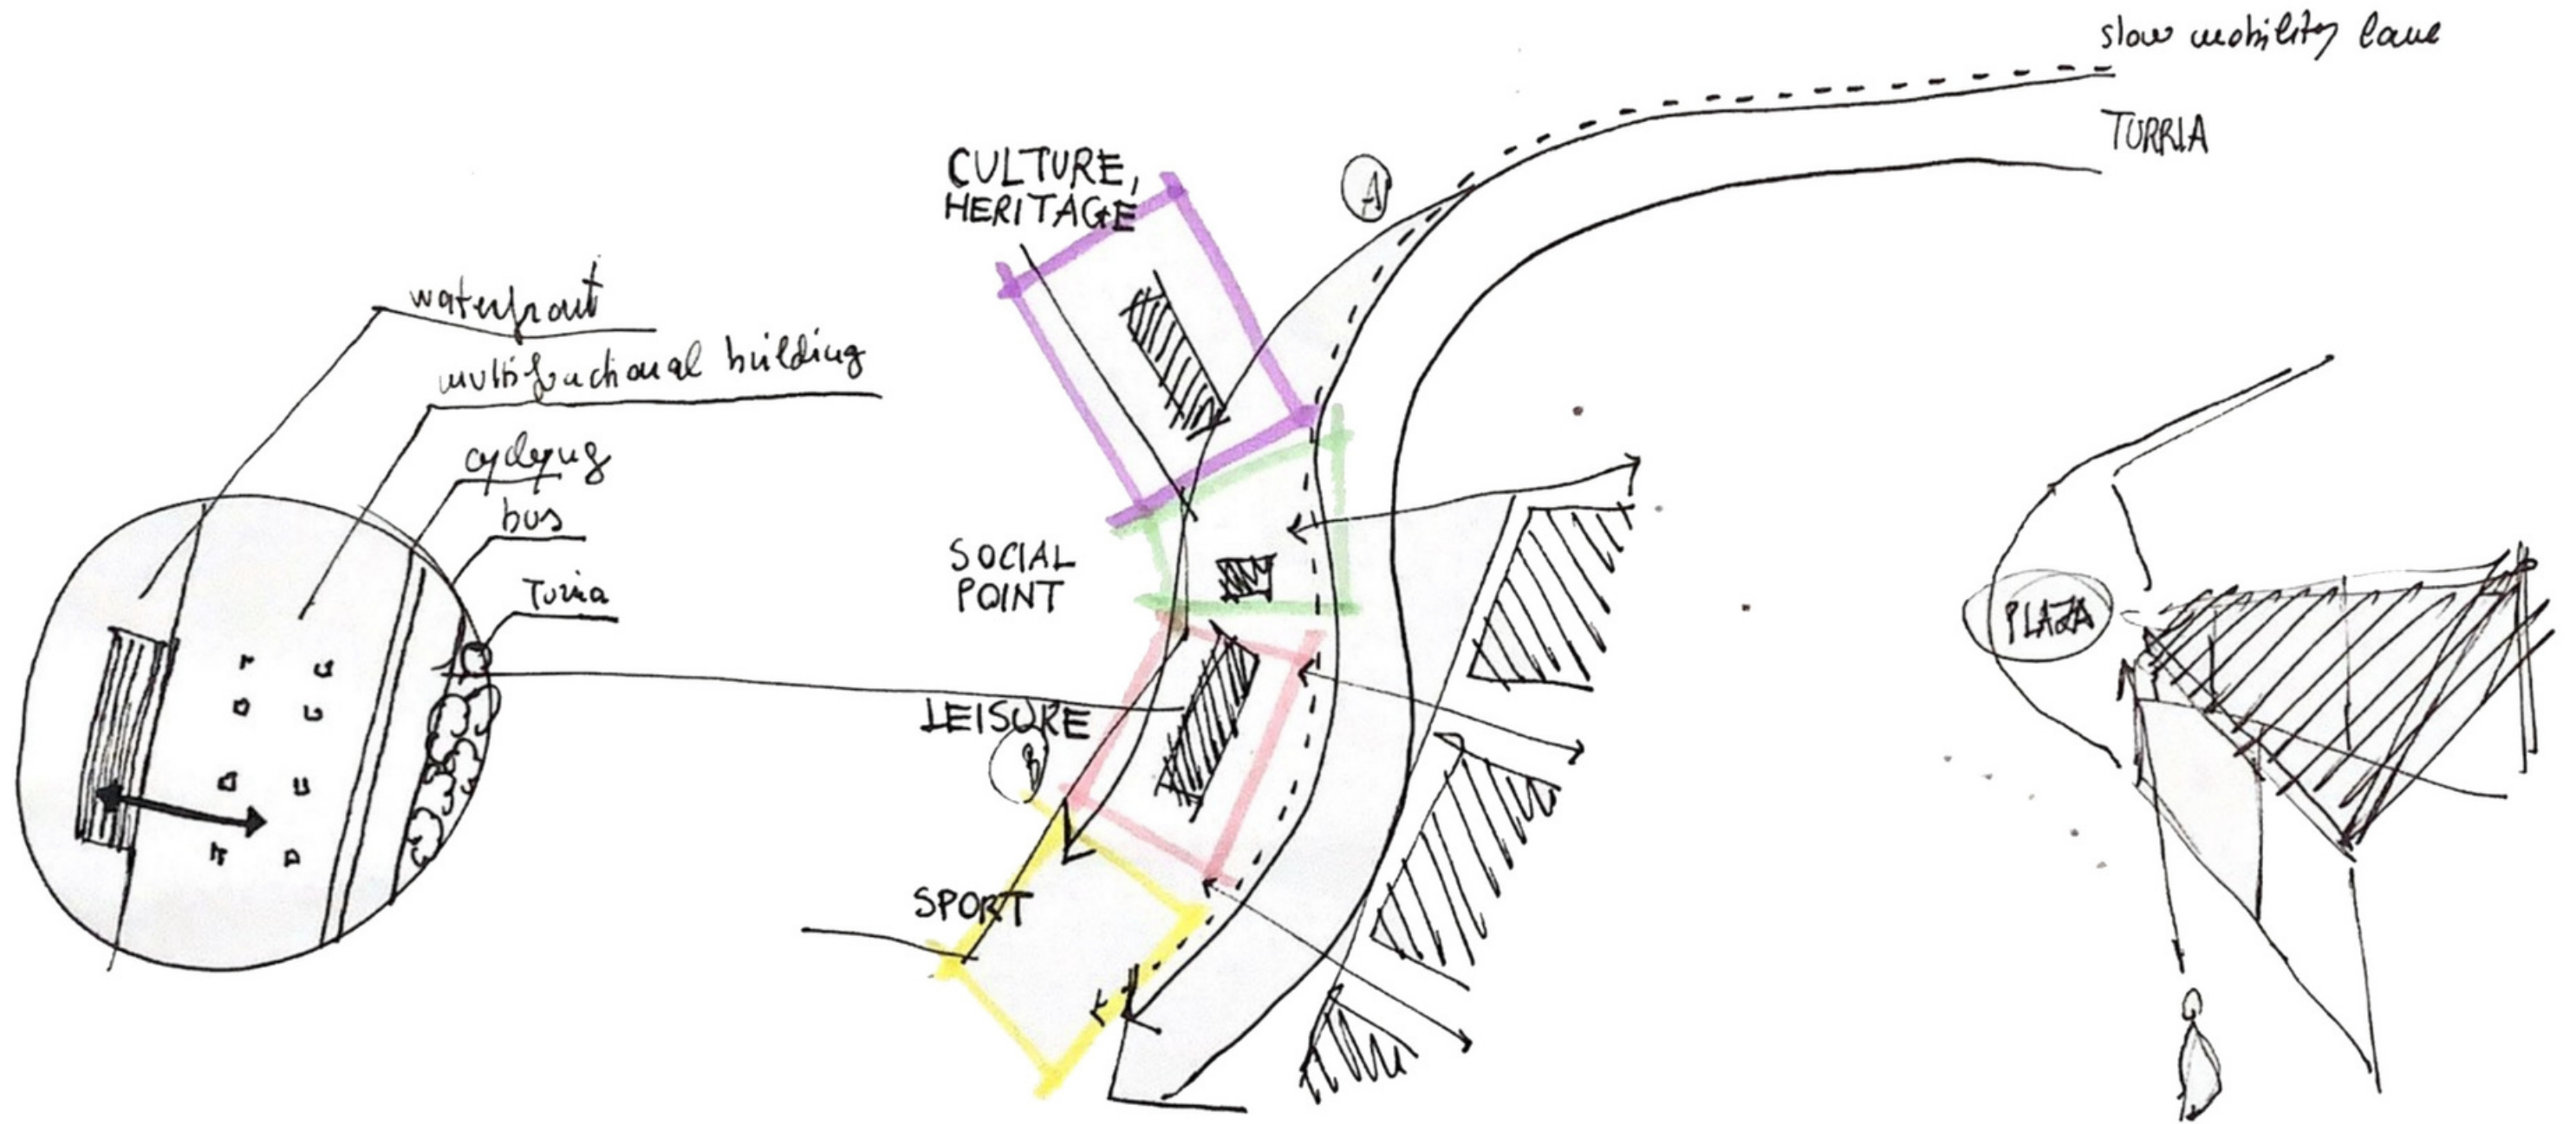

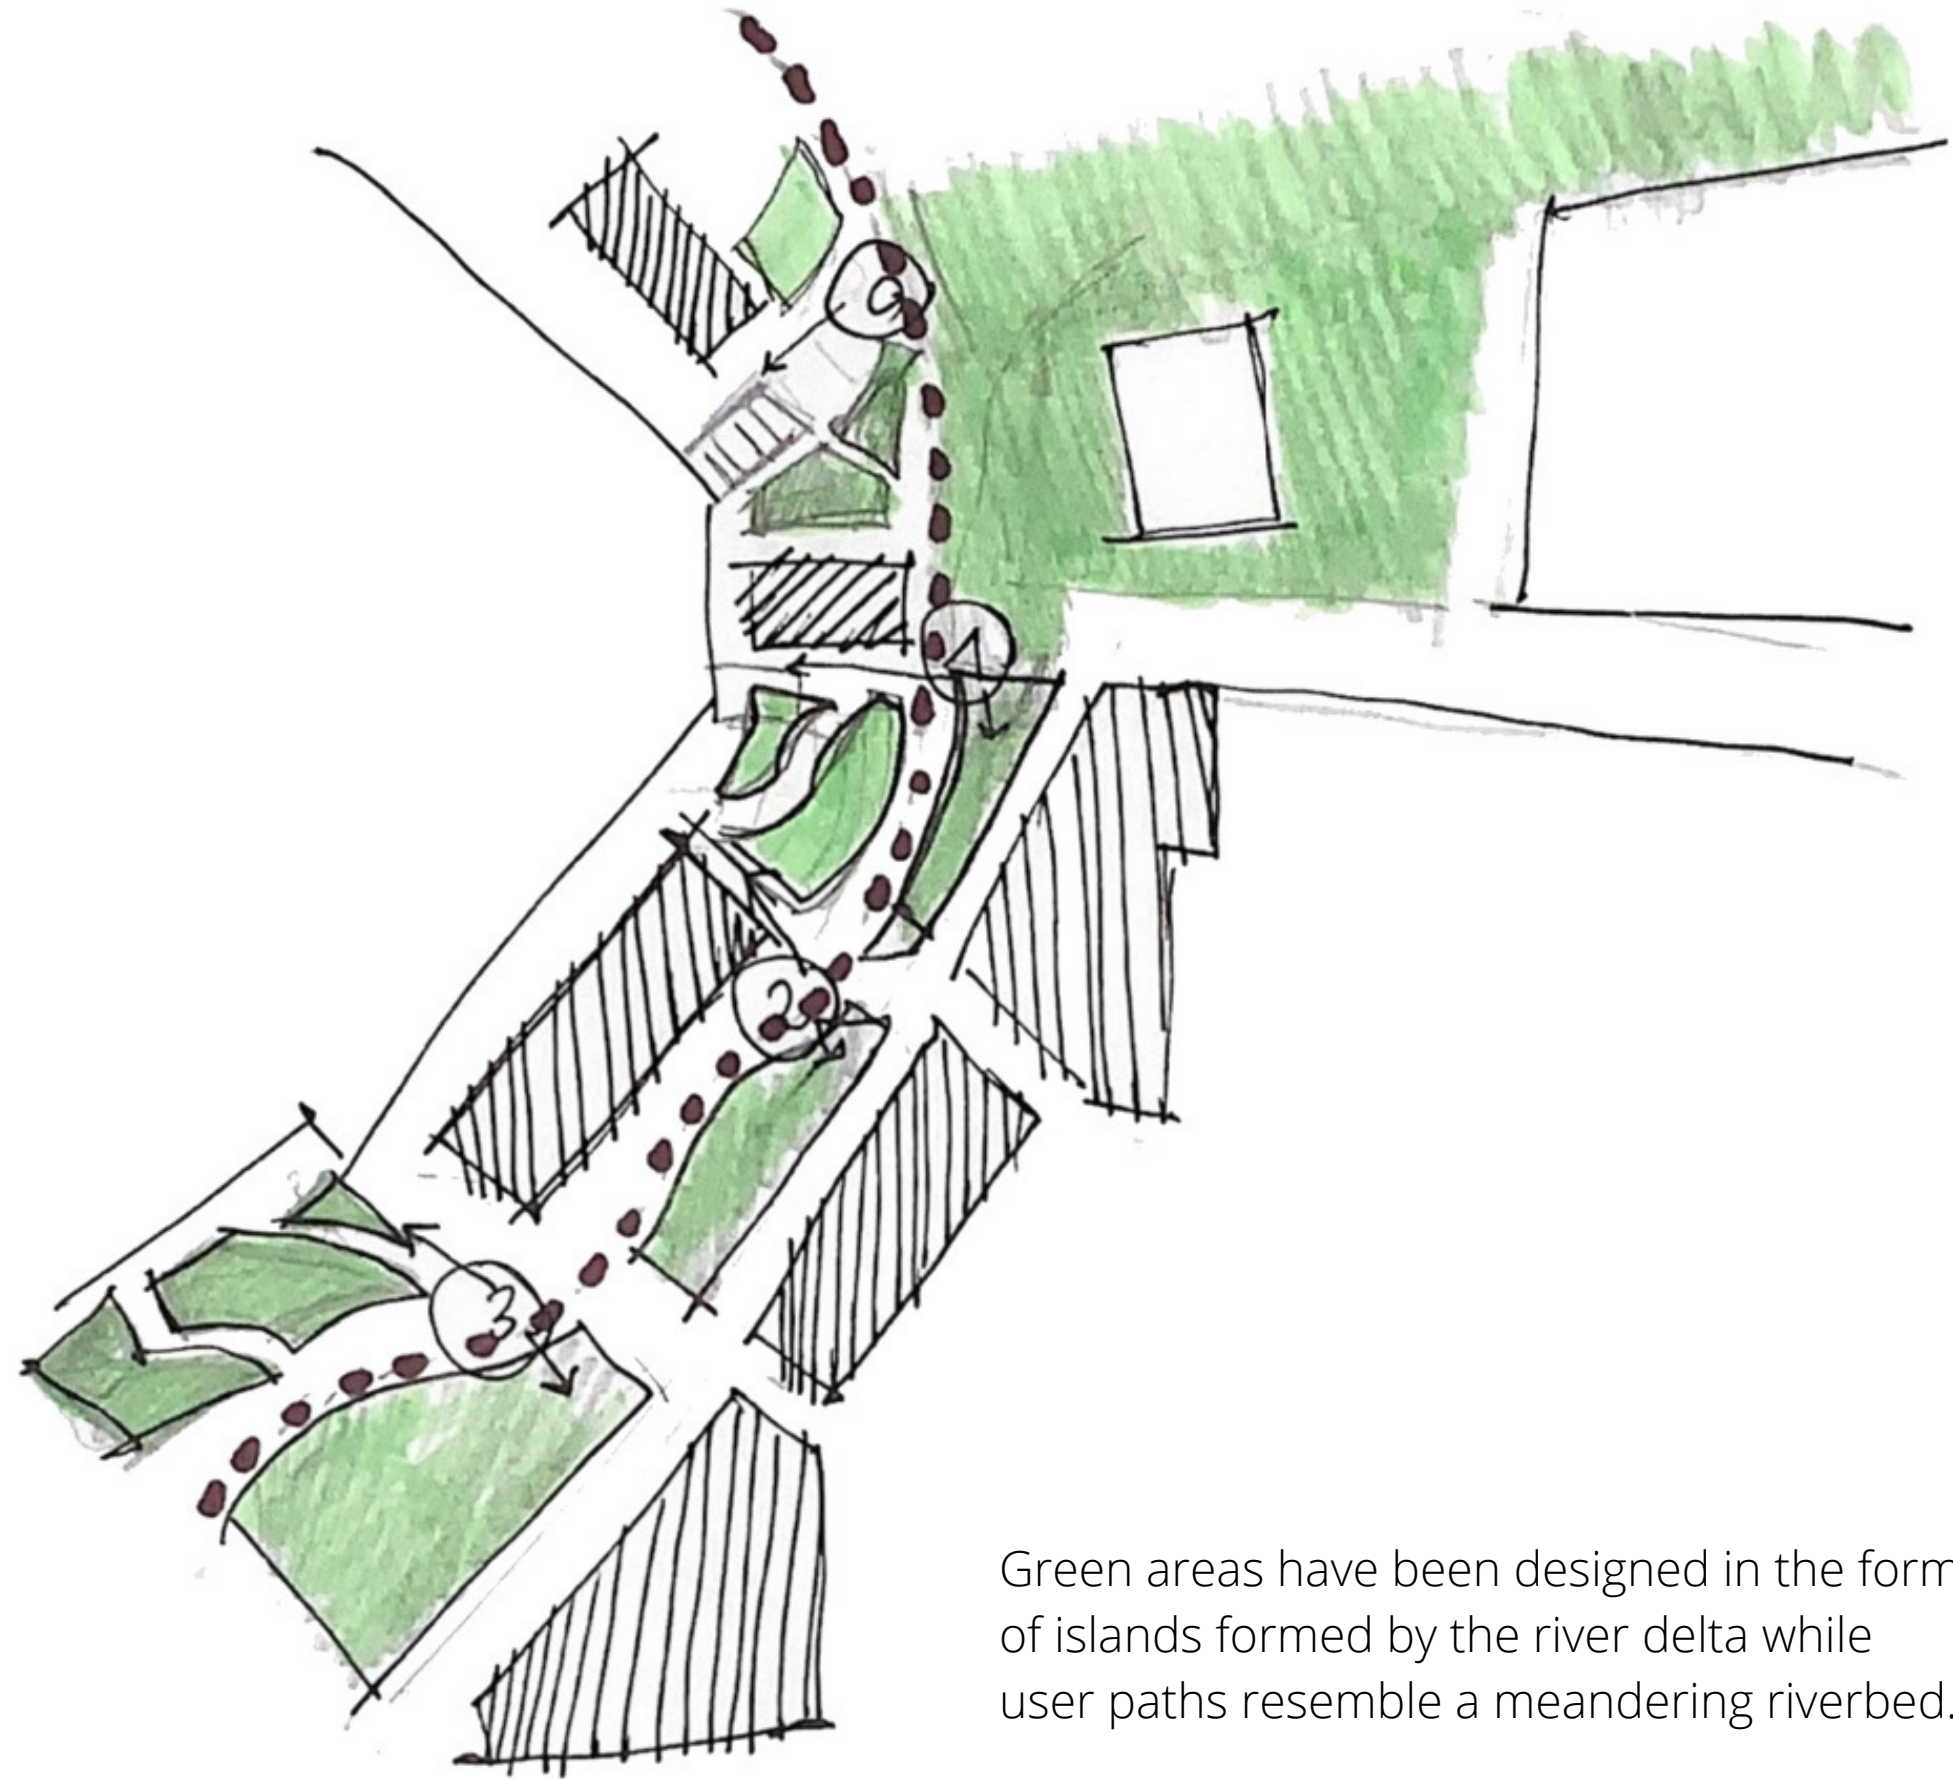

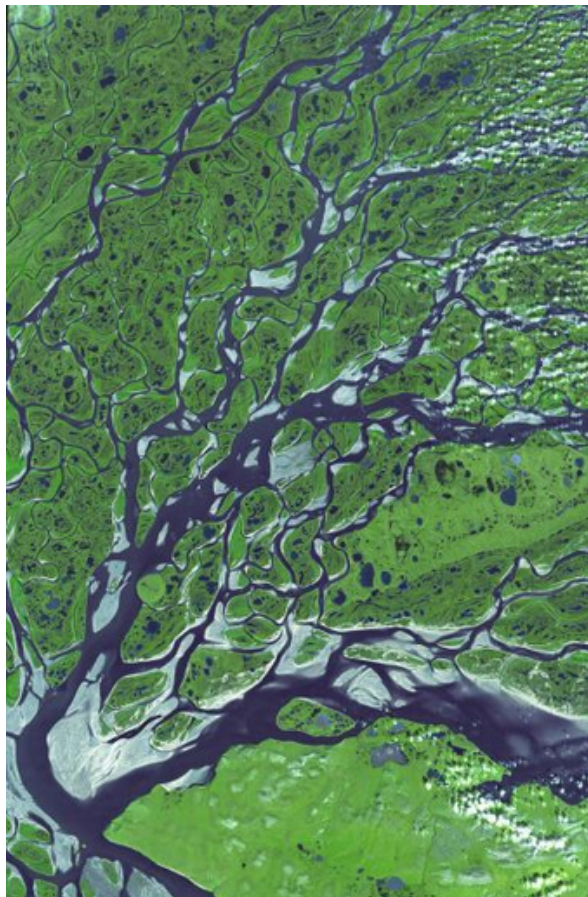

The transformation from an industrial port and traffic hub without any social involvement to being the cultural and social center of La Marina.

○ PERCEPTION OF SPACE / BUILDING
+ POSITIVE
- NEGATIVE

The proposal is conceived as a landscape following the same unique approach as we can see in Turia Park - various segments designed for specific use.

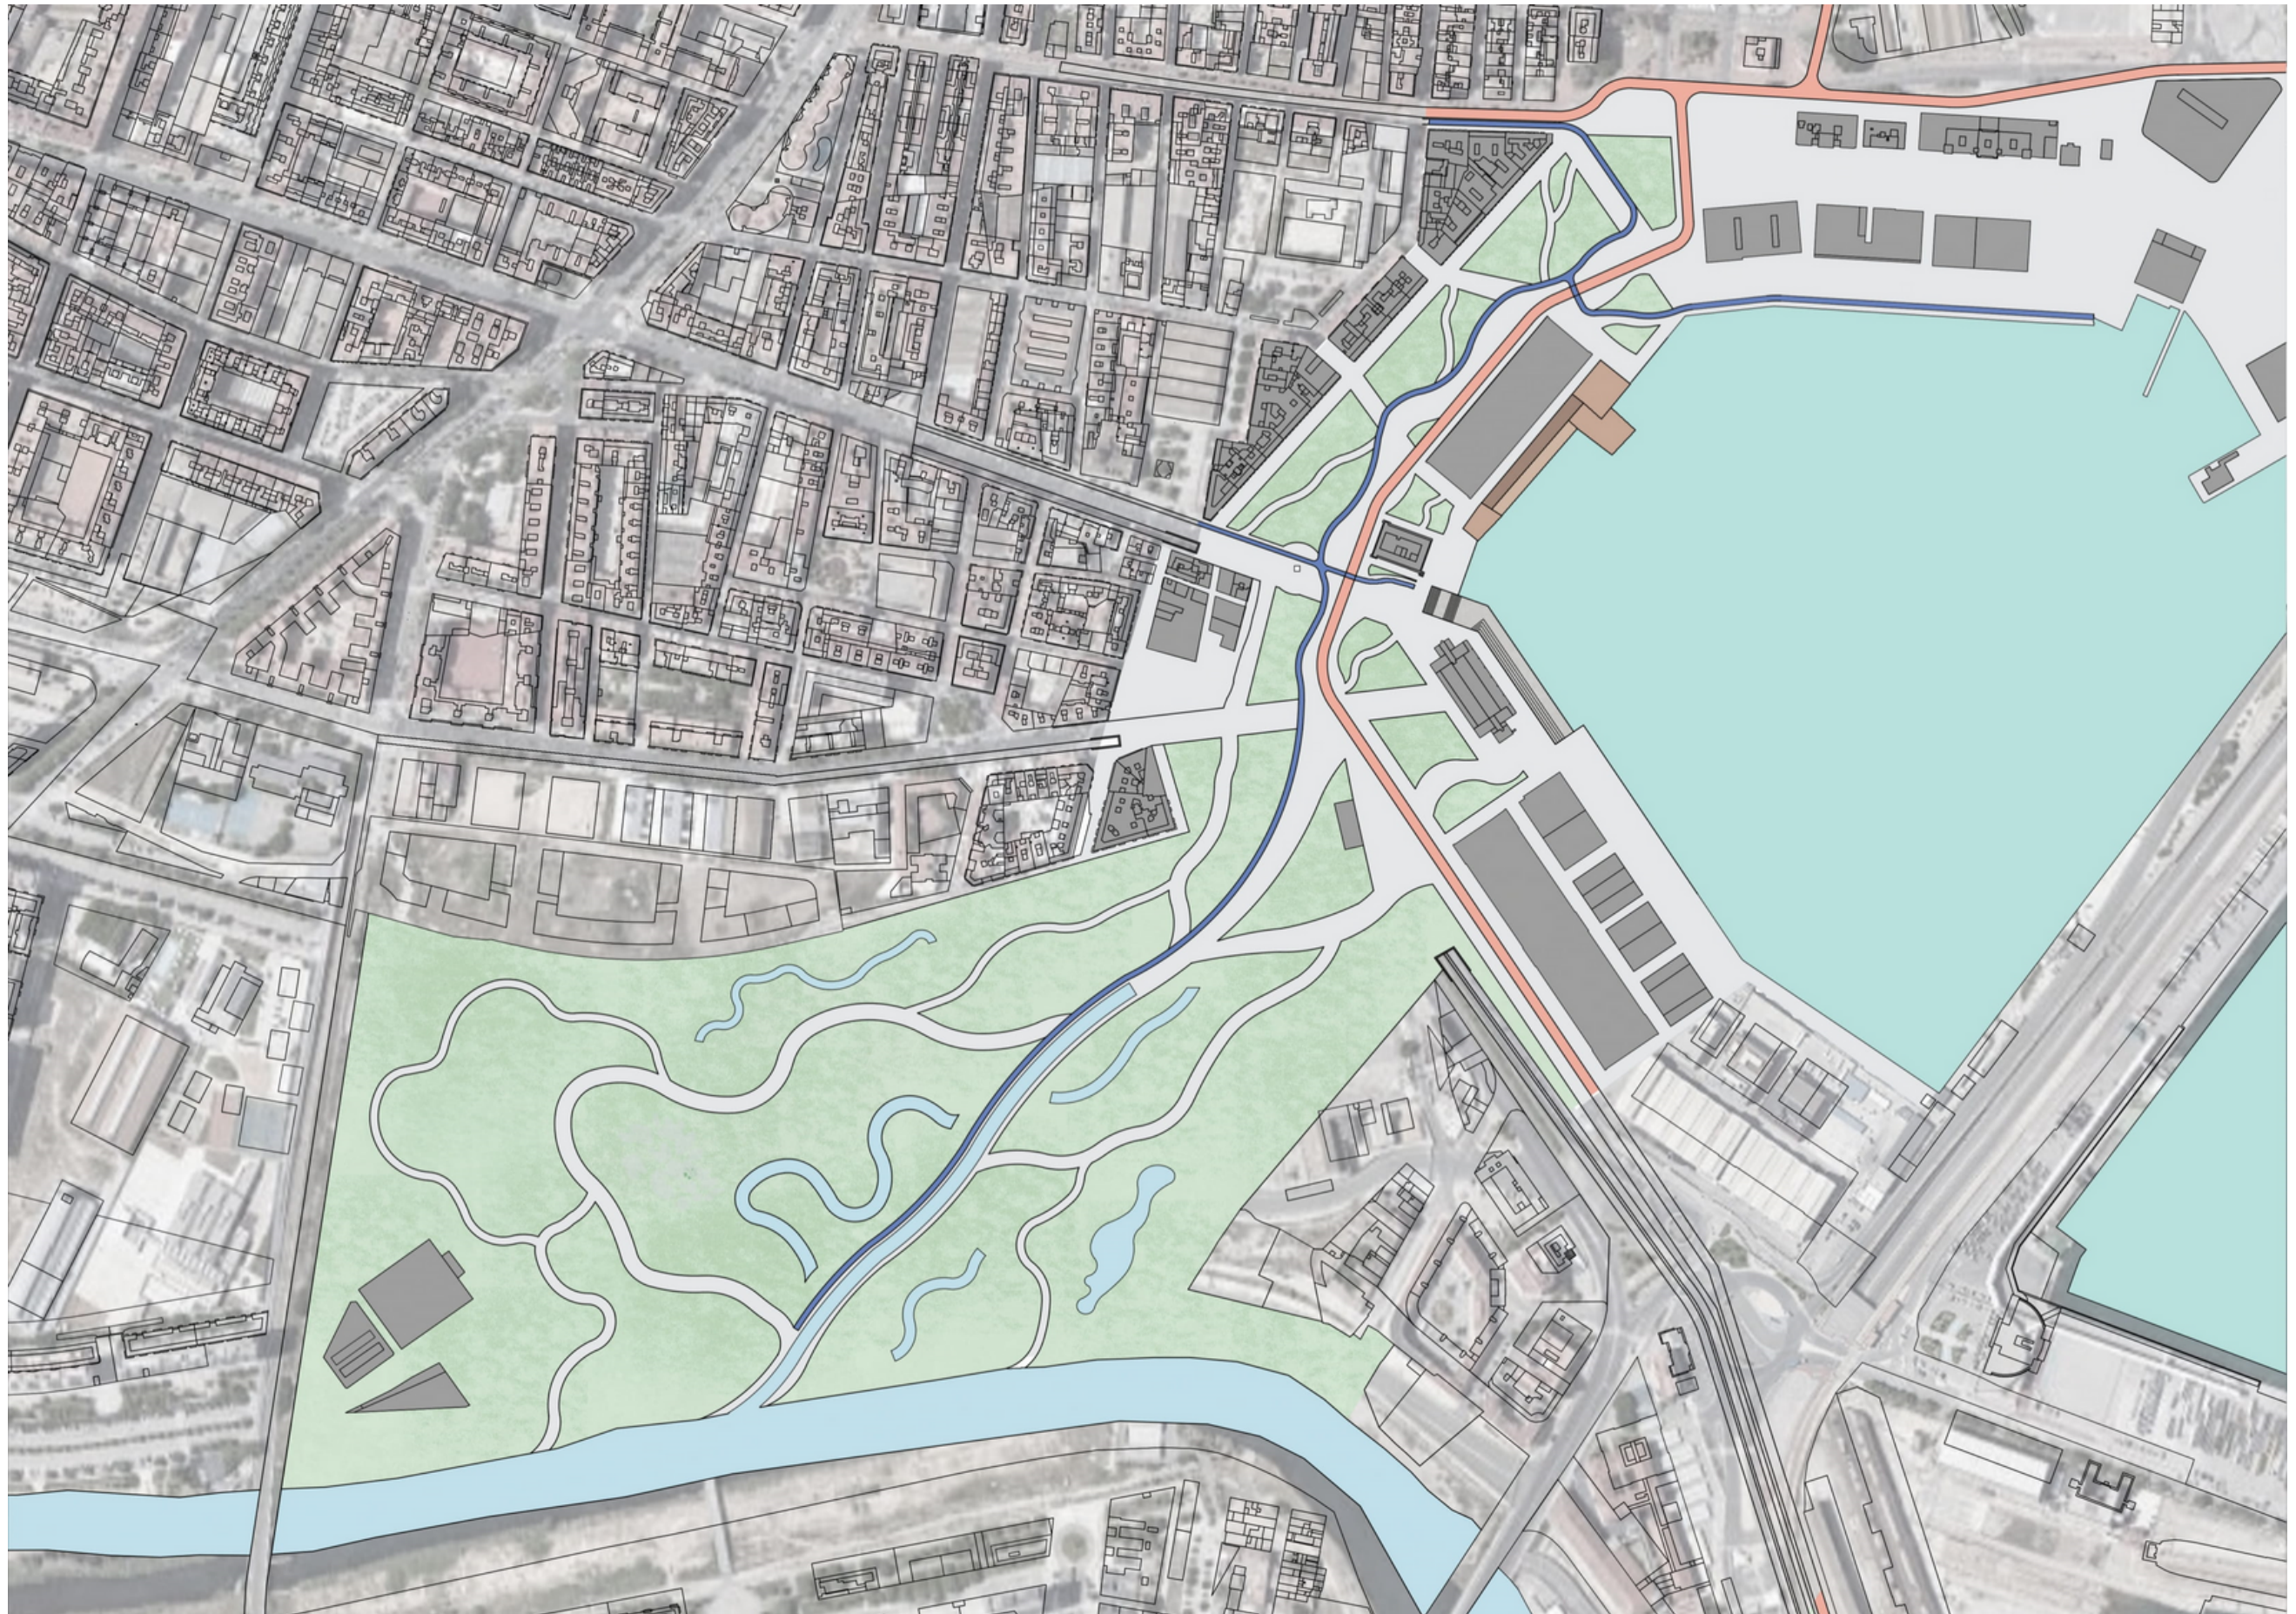

Green areas have been designed in the form of islands formed by the river delta while user paths resemble a meandering riverbed.
