

# ERASMUS KA2 WORKSHOP VALENCIA I SPAIN

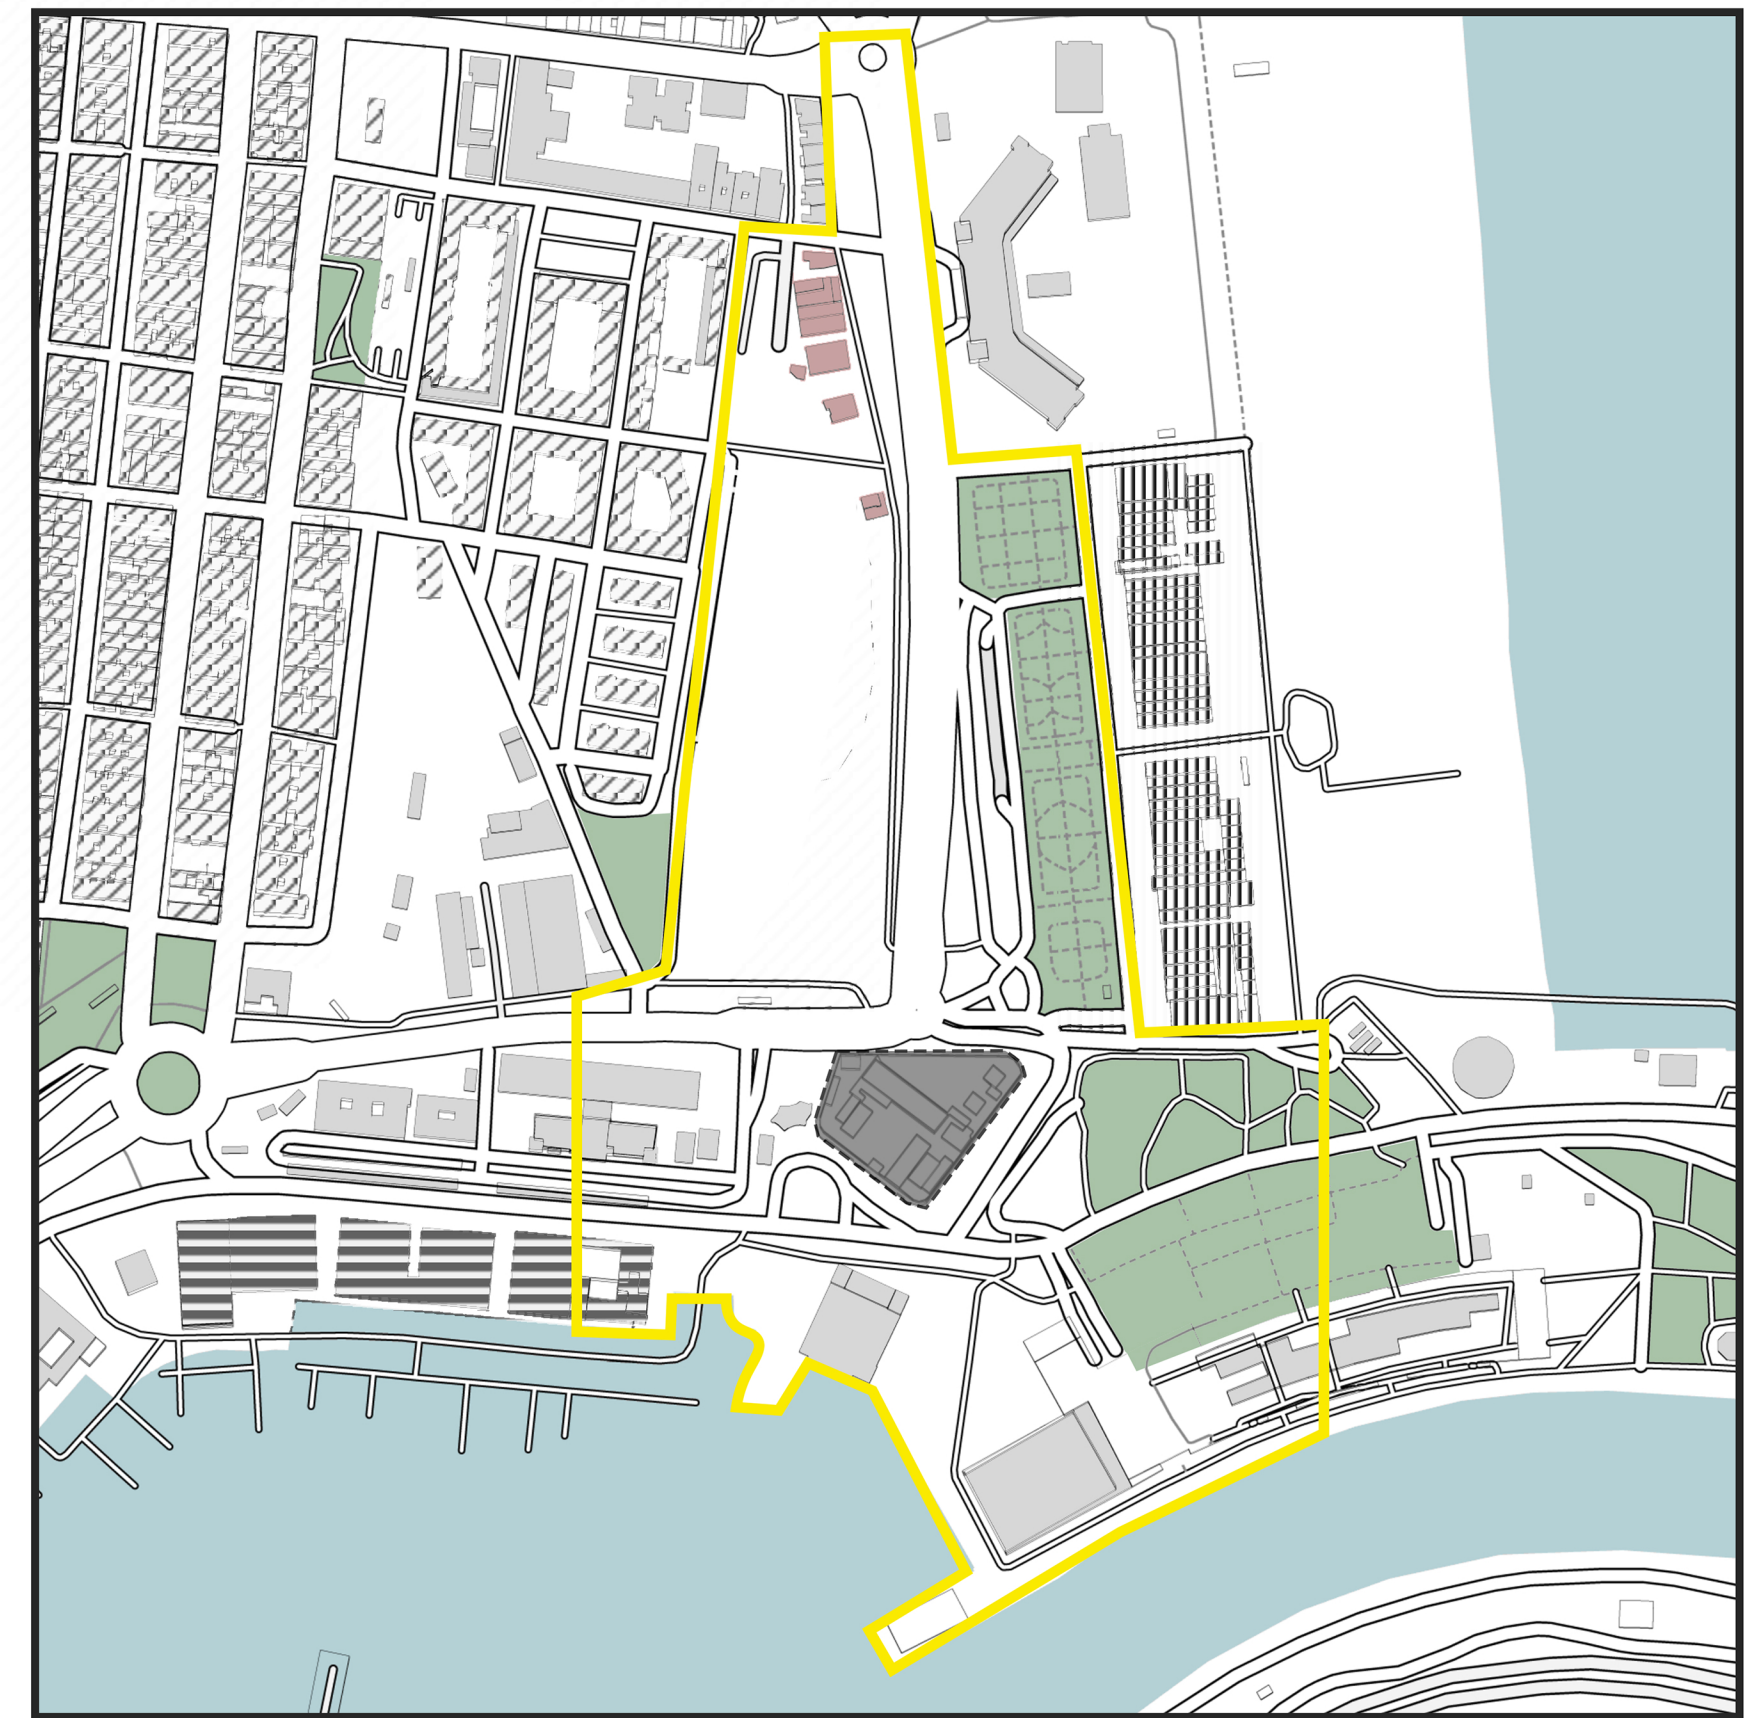

## ACTIVATION OF CONTEMPORARY PUBLIC SPACES

Prof. Dr. Luca MF Fabris | Dr. Mariusz Twardowski | Dr. Andres Ros Campos | Jose Luis Gisbert  
 Özgür Deniz Oymak | Sara Melanda | Paweł Młynarczyk

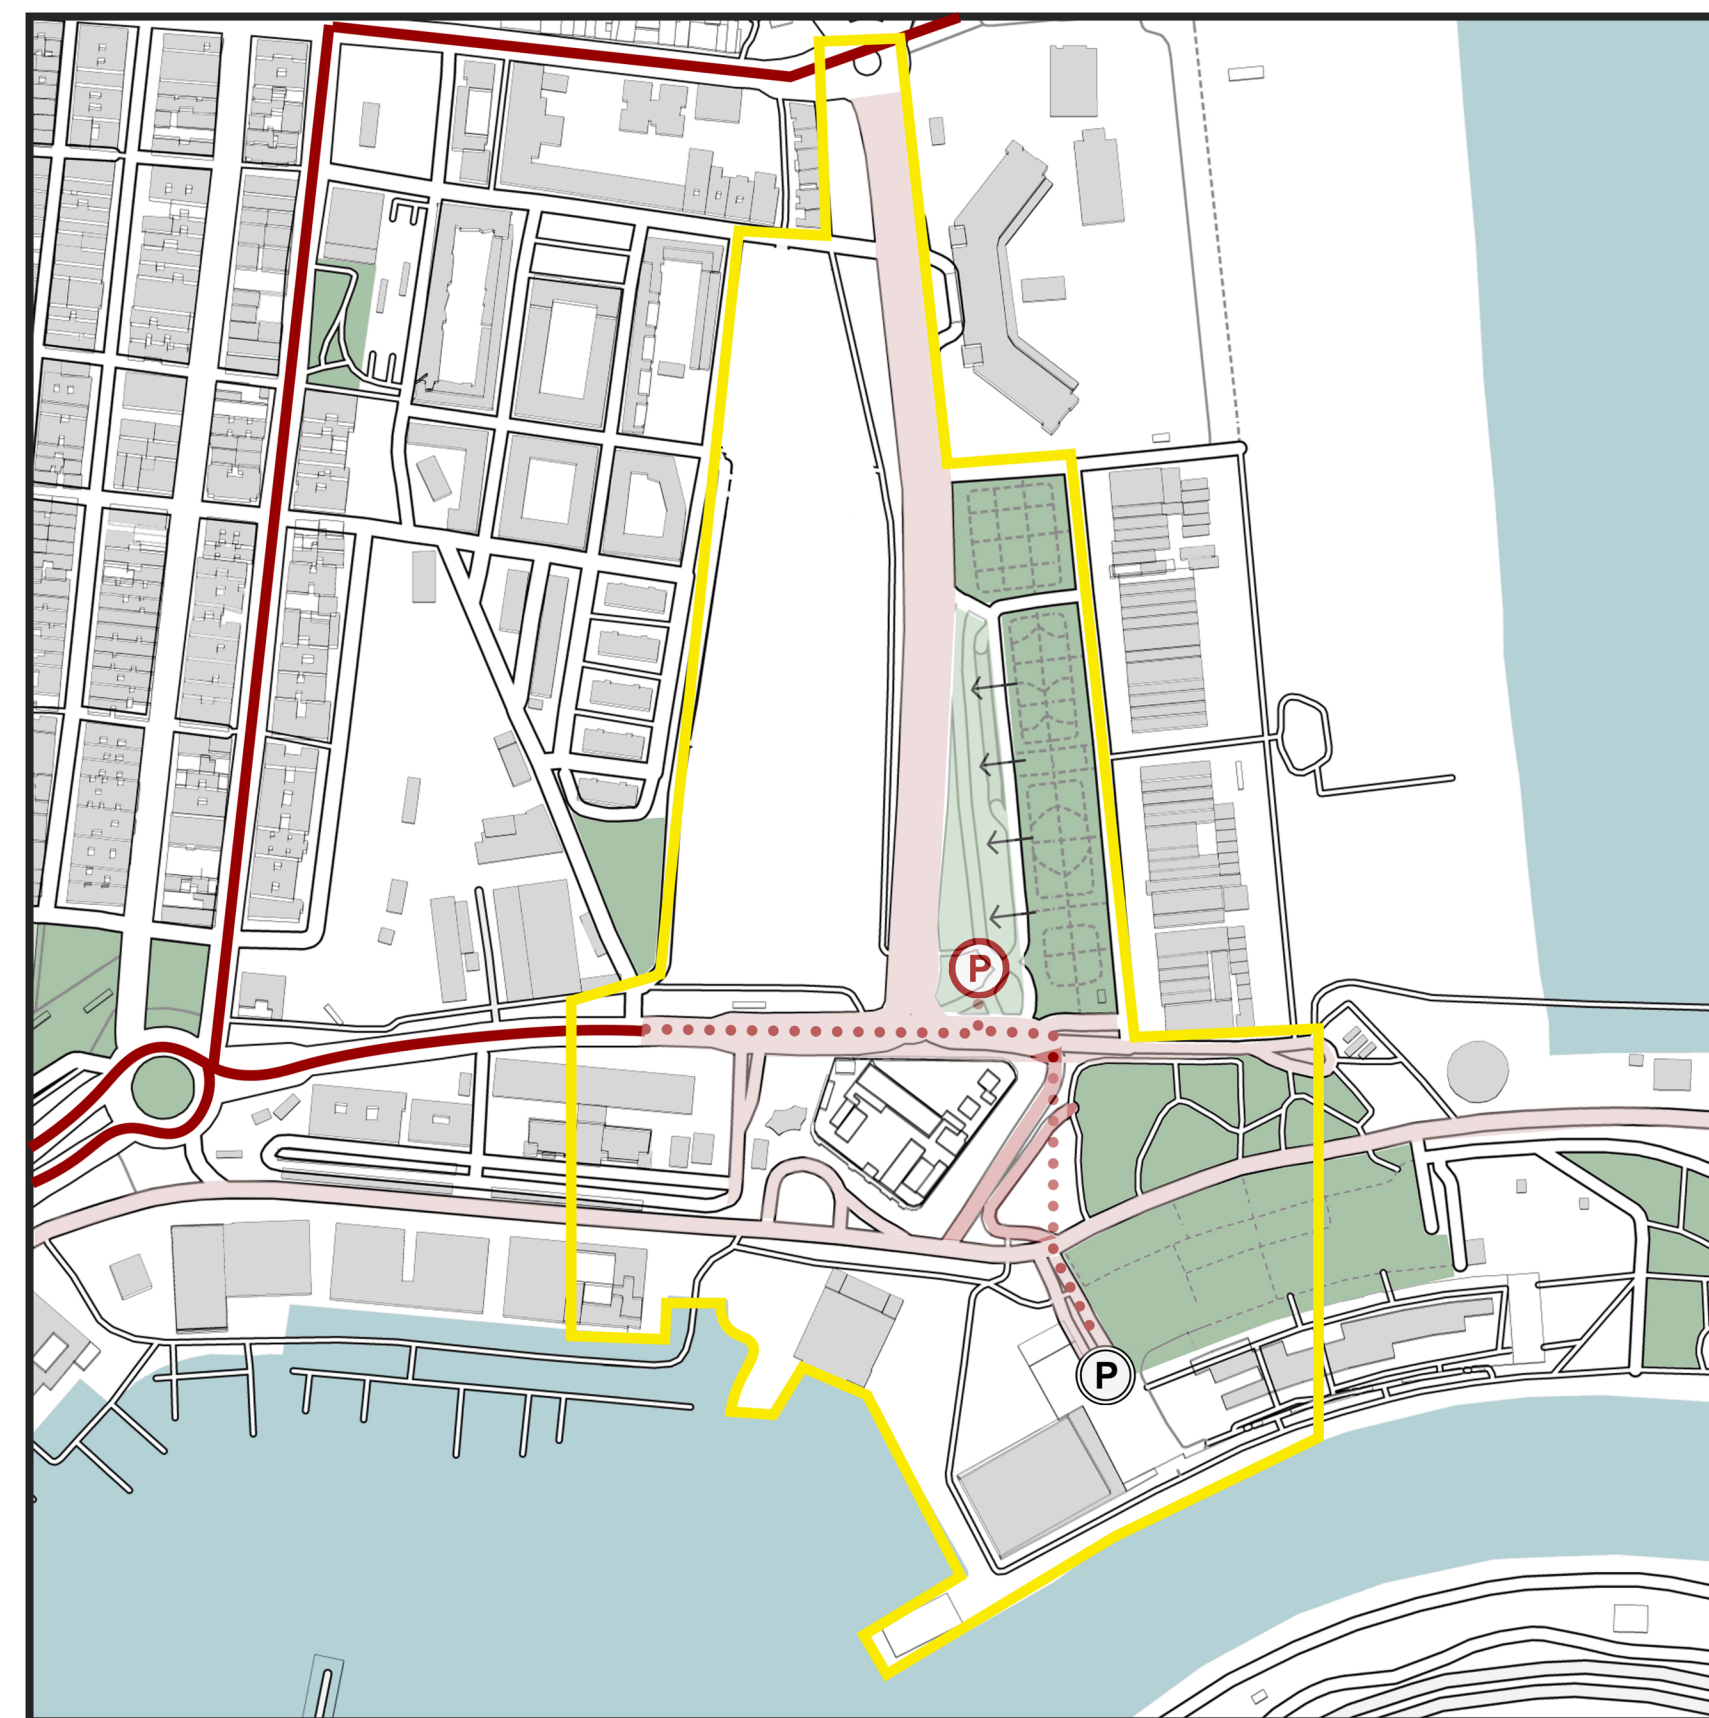

Area has great potential to become an initiator for the extension of green space and public activities. The open air car parking space, which is currently redundant and dysfunctional, is revitalized with the strategy of pedestrianization of the area. Patches of greens are connected in a three-winged pattern. The abandoned building that is also in the geometric center of the area is the generator of activity as a gathering space that branches out to the three-wings. These flexible activities which will bring public attraction to the site are organized by a grid of temporary structures.

### 1 Identification of Existing Buildings and Their Usage

### 2 Regulation of the Private Transportation Scheme

### 3 Facilitating the Public Transportation Access

### 4 Extending Residential Pattern to East & Connecting with the Beach

### 5 Creating a Grid for Activity Generators: Temporary Pavilions
