MILANO 1863**

Existing Condition

- TRAIN LINE
- TRAM LINE
- CARS AND PEDESTRIANS

What do we want in this space?

The aim of the project is to **activate** the Piazza Tirana, bring residence together by providing **diverse** activities, and create a more pedestrian, bike friendly space for new residence and existing neighbouring residents.

Integration of **nature** with the structure,

and

Flexible, easy to assemble, economic, durable,

expandable based on function **structure**

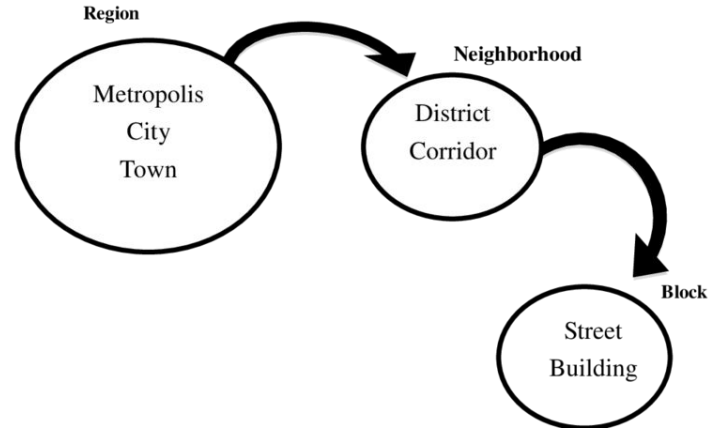

Who are the users?

Neighbourhood district residence who are coming to the site by bike or walk for shopping, co-working space, and a library.

Current and future residence of Piazza Tirana who come to the site by walking to enjoy the scenery.

People who are using tram, metro, and train to come to the site.

Population is growing,

cities are growing,

Why not our public space has a potential to grow?

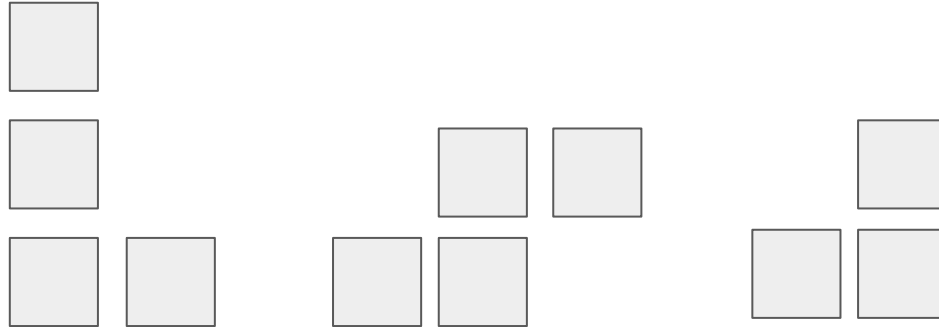

Can we imagine a public space as a tetris game?

Merge and change their size based on their function and use,

Integrate programs,

Expand as needed

And create a fun public space!

Solution?

Scaffolding Structure!

It responds quickly and flexibly to the internal and external pressures

Solution?

Flexible,

Easy to assemble,

Economic,

Durable,

Expandable based need

Connection

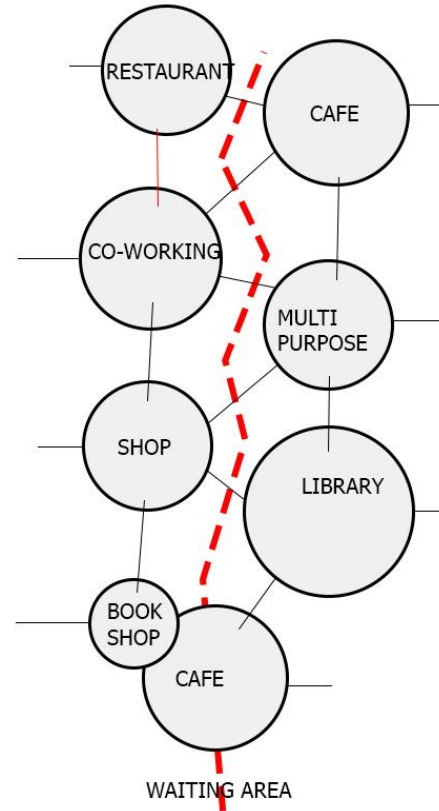

Connection

Programs

To response different users need

- Cafe
- Restaurant
- Bookshop
- Library
- Co-working
- Multipurpose room
- Market/Craft Shops
- Exhibition
- Play ground

Proposal

Topography

The topography is a changing texture:
from stone to vegetal areas, varying
through smooth transitions
