Table of C

Session A

Seeds of architecture:

Architecture as a method and/or as a discipline.
Nowadays, there can be a shift in teaching architecture from defining a specific knowledge inside the discipline or a series of methods that can be generalised and exploited for the practice.
Architecture of the Masters and/or of the topics.
Masters overlooked the teaching systems before the 20th; however, topics can be another point of view in validating the system of knowledge transmitted to future generations.

Transformations of public spaces - sustainable and ethical approach to architectural and urban design using mixed cultural background

Patrycja Haupt - Mariusz Twardowski - Luca M. Fabris - Gerardo Sempregon - Riccardo M. Balzarotti - Andres Ros Campos - Jose Luis Gisbert - Pedro Verdejo Guimeno

Transformations of public spaces are an integral part of city life. These processes although addressing site specific problems are universal for the urban centres across European countries struggling with desurbanisation, social exclusion, massive tourism, climate change and pollution.

The study is based upon the outcomes of the series of international workshop showing the approach to public space in different location. The aim of research is to show what problems addressed during the design workshop had a universal dimension and which ones were more site specific, addressing the needs of the local community. The basic research question asked was also how to transform public space in order to create active, reach, inclusive and climate neutral environment for the inhabitants. What are the factors in the public space creation that would result in active public space? The research methodology was based on a multi-criteria comparative analysis of activation factors in selected public spaces and evaluation of students' proposals according to those factors. These transformations were often driven by specific objectives, such as creating iconic landmarks, improving public safety, or generating economic activity on the other hand some of the proposals were concentrating on local community needs introduced by the meetings with local stakeholders. A hybrid approach that combines the strengths of both approaches provided by the workshop methodology was proved effective didactic method.

Patrycja Haupt, DSc PhD Arch., MPOIA, Assoc. Prof. of Faculty of Architecture at CUT. The main field of research involves the pro-ecological tendencies in design and their impact on the image of contemporary urban space.

Arch. Mariusz Twardowski, PhD, DSc, Eng., Assoc. Prof. at the Faculty of Architecture of the CUT, owner of Mariusz Twardowski Architektura, author scientific publications, laureate of 25 main prizes in architectural competitions.

Dr. Andrés Ros-Campos, PhD. Architect teaches at the CEU UCH University, investigates abstraction in architecture, the current relationship between architecture and landscape, the activation of the urban space of the contemporary city.

Luca Maria Francesco Fabris, journalist and architect, obtained a PhD in Architectural and Environmental Technology. He is a Beijing University of Civil Engineering and Architecture Distinguished Associate Professor at the PoliMI.
